

Nurun Application: Off-Grid Diesel Generator (DG) Optimizer

**Emissions reduction
of CO2**

**Green energy
storage**

**Saudi
Made**

**30% - 35%
Diesel saving**

**Reduce DG hours
from 24h to 6h**

ABOUT DG OPTIMIZER

An optimizer connected to the system of the diesel generator to improve its efficiency and reduce the dependency on diesel resulting in reduced DG maintenance, reduced DG hours, and long battery life which with integrated BMS allows for effective monitoring and protection. A safe solution, characterized by its temperature tolerance, therefore, does not require active cooling.
